

Virginia Highland B&B

Rates range from \$119 to \$179 year-round at the cozy Virginia Highland B&B. Amenities include free WiFi and flat screen TV/DVD. Probably the most impressive amenity is Adele, a wonderful cook and meticulous housekeeper who makes friends with everyone she meets.

A cozy, 1920s craftsman bungalow, Virginia Highland B&B was damaged in a 1995 house fire, but was fully restored/re-modeled with the help of the architectural firm of Menefee + Winer. Adele has owned the home since 1973; it's been a B&B for the past 13 years. The formal dining room features a fireplace and the screened porch includes a Pawley's Island hammock and porch swing. The living room is furnished in 50s retro style, and the old-fashioned kitchen includes the original high back sink.

After settling here from Chicago in the late 60s, Adele became very active in the community. She's a master gardener, and Virginia Highland B&B, known for its rose arbor, is one of the stops on the area's Garden Tour. In 2006, the garden was designated an Audubon Wildlife Sanctuary. "Our balconies look out into the treetops of the

shade garden," Adele said. "It's a great place for birding – and the Botanical Gardens are just a short walk away!"

“Over the past 10 years, the most important change to take place in diagnostics is the move from two-dimensional radiographic imaging to three-dimensional cone beam computed tomography (CBCT).”
-Allan G. Farman, BDS, PhD, MBA, DSc, president-elect of the American Academy of Oral and Maxillofacial Radiology
